## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 26 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The Formula 2 is undefined

Claims 27-37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear how the dependency of these claims is to be interpreted since they all depend from canceled claims.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1621

Claims 26-37 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-11 of U.S. Patent No. 6,610,887. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are but a subset of the claims of the patent.

The difference between the instant claims and those of the patent are the sets of definitions for  $R_1$  and  $R_{2-3}$ . The instant definitions are narrower than those of the patent. However, both sets of definitions in the patent are chosen from a rather limited list, for example, the definition of  $R_1$  in US 6,610,887 is: alkyl, aralkyl, heteroalkyl, aryl or heterocycle. That being the case, the number of combinations of the sets of variables  $R_1$  and  $R_{2-3}$  is of such a limited nature that each of them would have been immediately envisioned by the ordinary practitioner and therefore obvious.

(The examiner notes for the record that there appears to be an error in the issued patent, viz., H seems to be missing from the definition of  $R_{2-3}$  in claim 1 [compare patented claim 8]).
